Fetal Monitors

Quantity needed: ~~6~~ 1
Cost per unit: \$25,000

Advanced Care for Mother and Baby

Fetal monitors are critical for ensuring the health and safety of both mother and baby during pregnancy, labour, and delivery. They provide real-time tracking of fetal movement, heart rate, and uterine contractions, allowing the medical team to detect complications early and respond swiftly.

Why It's Needed

Richmond Hospital's five existing monitors are nearing the end of their lifespan, making it harder to maintain the highest standard of care. New Fetal Monitors offer enhanced accuracy, real-time tracking of both mother and baby, and the ability to monitor multiple heartbeats simultaneously. Adding a sixth monitor will help meet the growing needs of our maternity unit, ensuring families receive uninterrupted, high-quality care from the very first moments of life.

How It Will Make a Difference

- **Greater Accuracy:** Tracks and displays the heart rates of both mother and baby separately, ensuring faster diagnoses and critical decision-making
- **Advanced Multi-Fetal Monitoring:** Can track up to three fetal heart rates at once, eliminating the need for multiple monitors in twin and triplet pregnancies
- **Continuous, Reliable Care:** New monitors will provide consistent, uninterrupted monitoring daily

Your Impact

Your generosity will make a significant impact. By providing our health care teams with the latest technology, you'll ensure every heartbeat is monitored with precision and every family can welcome their newest addition with peace of mind and joy.

Give today – help mothers and their babies begin their journey with the strongest, healthiest start.

Consistent with our Fiscal Responsibility policy, a 10% contribution (already included in total listed) from all designated donations will support the Gift of Health Fund and the work of Richmond Hospital Foundation to improve care for patients and families.
